EXECUTIVE OFFICE OF THE PRESIDENT
OFFICE OF MANAGEMENT AND BUDGET
WASHINGTON, D.C. 20503

July 11, 2014

The Honorable John A. Boehner
Speaker of the House of Representatives
Washington, DC 20510

Dear Mr. Speaker:

Section 1106 of Title 31, United States Code, requests that the President send to the Congress a supplemental update of the Budget that was transmitted to the Congress earlier in the year. This enclosed supplemental update of the Budget, commonly known as the Mid-Session Review, contains revised estimates of receipts, outlays, budget authority, and the budget deficit for fiscal years 2014 through 2024.

Sincerely,

Brian C. Deese
Acting Director

Enclosure

Identical Letter Sent to the President of the Senate

SUMMARY

This Mid-Session Review (MSR) updates the Administration's estimates for outlays, receipts, and the deficit for economic, legislative, and other changes that have occurred since the President's 2015 Budget (Budget) was released in March 2014. The 2014 deficit is now projected to be \$583 billion, \$66 billion lower than the \$649 billion deficit projected in March. As a percentage of gross domestic product (GDP), the 2014 deficit is now projected to equal 3.4 percent, down from the 3.7 percent projected in March. Going forward, the MSR estimates that the deficit will fall to below 3 percent of GDP in 2015 and to 2.1 percent of GDP by 2024. The MSR also shows that the Budget's policies achieve the core goal of fiscal sustainability by stabilizing Federal debt as a share of the economy and putting it on a declining path.

CONTINUING THE NATION'S FISCAL AND ECONOMIC PROGRESS

Thanks to the hard work and resilience of the American people, the economy and our Nation are continuing to move forward. Businesses added more than 9.7 million jobs over 52 straight months of job growth. The manufacturing sector added more than 650,000 jobs since February 2010, the strongest period of growth since the 1990s. The unemployment rate is at its lowest level in over five years. We now produce more of our own oil at home than we buy from the rest of the world. And health care costs are growing at exceptionally low rates, even as millions of people gain health insurance coverage.

While our economy is moving forward and businesses are creating jobs, it is clear that much more needs to be done to accelerate economic growth and expand opportunity for all Americans. For the last several years, manufactured crises in Washington hindered, rather than helped, economic growth and opportunity. But earlier this year, Democrats and Republicans came together to produce a budget agreement that invests in key areas of innovation, education, and infrastructure—investments that will help grow our economy, create jobs, and strengthen the middle class.

The MSR shows how we can build on that progress. By investing in our infrastructure and manufacturing, simplifying the tax code for businesses, reforming our skills and job training programs, and fixing our broken immigration system, we can create jobs and achieve stronger and more inclusive economic growth. By rewarding hard work with fair wages, equipping all children with a high-quality education to prepare them for a good job in the future, making sure a secure retirement is within reach, and ensuring health care is affordable and reliable, we can expand opportunity for all Americans. By cutting wasteful tax breaks for the wealthiest Americans and making common-sense reforms to Government programs, we can manage our Government more efficiently and effectively, and continue to cut the deficit in a balanced way.

Under the President's leadership, the deficit has already been cut by more than half as a share of the economy, representing the most rapid sustained deficit reduction since World War II. This progress is largely the result of increased economic growth, cuts to discretionary spending in the Budget Control Act (BCA), and the restoration of tax rates on the highest earners to 1990s levels in the American Taxpayer Relief Act.

The policies in the Budget will strengthen the economy by making investments for the long term, while continuing to bring our deficits down as a share of the economy and putting debt on a declining path as a share of the economy. The MSR shows that, under the Budget's policies, deficits decline to just above two percent of GDP by 2024, with the debt stabilized by 2015 and declining after that.

To ensure the nation's long-term fiscal strength, the Budget focuses on the primary drivers of long-term debt and deficits. It builds on the reforms in the Affordable Care Act with another \$404 billion in health care savings, continuing to slow health care cost growth and improve the quality of care. It curbs inefficient tax breaks that benefit the wealthiest, and calls for pro-growth, commonsense immigration reform, which the

Congressional Budget Office has found would increase economic growth and reduce the deficit by about \$160 billion in the next decade and by almost \$1 trillion over the next twenty years.

THE PRESIDENT'S 2015 BUDGET: A ROADMAP FOR ACCELERATING GROWTH AND EXPANDING OPPORTUNITY

In the immediate aftermath of the Government shutdown in October, the President called on both parties to return to regular order in Washington. The enactment of the Bipartisan Budget Act of 2013 (BBA) and the Consolidated Appropriations Act of 2014 (CAA) represented compromise between Democrats and Republicans and important first steps toward ending manufactured crises and replacing the damaging cuts caused by sequestration with long-term reforms. But they did not go far enough. In particular, while the BBA replaced half of the discretionary sequestration cuts for 2014, it replaced just one-fifth of the scheduled cuts in discretionary funding for 2015. As a result, taking into account projected growth in programs such as veterans' medical care and other factors, the BBA non-defense discretionary funding levels for 2015 are several billion dollars below the levels the Congress provided in 2014. They are also below 2007 funding levels adjusted for inflation, even though the need for pro-growth investments in infrastructure, education, and innovation has only increased due to the Great Recession and its aftermath.

Recognizing the importance of this bipartisan compromise, the Budget adheres to the spending levels agreed to in the BBA in 2015, and proposes difficult but necessary cuts and reforms to make room for investments in priority areas such as research, clean energy, early learning, and ending homelessness. But even with those tough cuts and reforms, the discretionary levels set by the BBA simply are not sufficient to ensure that the Nation is achieving its full potential in creating jobs, growing the economy, and promoting opportunity for all.

For that reason, the Budget also includes a separate, fully paid-for \$56 billion Opportunity, Growth, and Security Initiative. The Opportunity, Growth, and Security

Initiative, which is split evenly between defense and non-defense funding, shows how additional discretionary investments can spur economic progress and strengthen our national security. It will help restore our global edge in basic research, provide funding to support preschool across the United States, and help teachers take advantage of broadband technology in the classroom. It will invest in our communities through emergency response activities, juvenile justice programs, and expansion of Promise Zones, and will fund a national network of manufacturing institutes that will spur economic development. It will put people back to work, restoring our national parks, renovating veterans' hospitals, and building resilient infrastructure that will help our communities prepare for the effects of climate change. It will support partnerships between community colleges and employers to train workers for jobs that are in demand, including a bold new expansion of apprenticeship programs. It will also help us put a stop to short-sighted cuts to Government operations that compromise efficiency and effectiveness and cost money over the long run, such as growing deferred maintenance backlogs, sharp cuts to Federal employee training, and erosions in customer service at agencies like the Internal Revenue Service (IRS).

Importantly, the Budget also shows that this initiative is fully paid for, and easily affordable if the Congress is willing to enact a few common-sense spending and tax changes. Building on the model established in the BBA, the Budget outlines a specific set of mandatory spending reforms and tax loophole closers that would fully offset the cost of the Opportunity, Growth, and Security Initiative.

When considering both base funding and the Opportunity, Growth, and Security Initiative resources, the Budget provides a comprehensive and detailed plan for making investments that will drive the Nation forward. Without taking action, funding levels for 2016 and beyond will continue to preclude the investments needed to protect our Nation and enable our economy to achieve its full potential, since the BBA did not provide even partial sequestration relief after 2015. The Budget proposes to restore discretionary spending to a path that would continue to support economic growth, opportunity, and safety and security; these investments will also be paid for with a

combination of reforms to mandatory spending programs and targeted tax loophole closers included in the Budget. At the same time, discretionary spending under the Budget will still fall to its lowest level as a share of the economy in more than 50 years.

In addition, the Budget also takes key steps to enhance the Administration's efforts to deliver a Government that is more effective, efficient, and supportive of economic growth. It includes initiatives to deliver better, faster, and smarter services to citizens and businesses. It advances the Administration's effort to modernize the infrastructure permitting process, cutting through red tape, allowing more construction workers on the job faster, and achieving better outcomes for our communities and environment. The Budget also expands the use of shared services between Federal agencies and strategic sourcing to leverage the buying power of the Government, bringing greater value and efficiency for taxpayer dollars. Further, the Budget continues to open Government data and research for public and private sector use to spur innovation and job creation.

The Administration looks forward to continuing to work with the Congress on an or-

derly appropriations process that supports the President's goals of economic growth, opportunity, and our national security, while avoiding unnecessary fiscal crises that hold the Nation's economy back. This process should include reconciling funding levels for individual appropriations bills, and passing legislation without ideological provisions that could undermine an orderly appropriations process. The Administration also urges the Congress to swiftly pass the President's request for emergency supplemental funding to support a unified, comprehensive Federal government response to the significant increase in apprehensions of children and other individuals from Central America who are crossing into the United States in the Río Grande Valley areas of the Southwest border. Passage of the President's request would also ensure that sufficient funds are available to fight wildfires across the country this year and that we have a stable funding mechanism for wildfire suppression in future years.

ECONOMIC ASSUMPTIONS

This Mid-Session Review (MSR) updates the economic forecast from the President's 2015 Budget, which was finalized in November 2013 and released with the Budget in March 2014. The Budget forecast projected a strengthening economic recovery, with growth accelerating over the next several years. Unemployment was expected to decline as the economy recovered, and inflation was expected to remain stable and moderate. Interest rates were expected to remain low in the near term, but to rise gradually in the medium term. The MSR forecast, completed in early June, maintains this overall outlook with modifications to account for a decline in the Gross Domestic Product (GDP) during the first quarter of 2014, the rapid drop in the unemployment rate since the Budget economic forecast was finalized in November, a reassessment of projected interest rates, and other factors.

Since the second quarter of 2009, and through the first quarter of 2013, real GDP has increased by a cumulative 10.2 percent. In early 2010, following the resumption of real GDP growth, the private sector began adding jobs. Since then, private-sector employment has increased steadily, and 9.7 million new jobs have been created. In May 2014, total nonfarm employment reached a new high, surpassing the peak before the 2008-09 recession, and the unemployment rate has declined from its peak of 10.0 percent in October 2009 to 6.1 percent in June. The housing market has also begun to contribute to the recovery. The steep decline in residential investment ended in 2010, and housing starts and home prices have rebounded over the past three years.

Administration policies have contributed to the economic rebound, as have automatic fiscal stabilizers. The American Recovery and Reinvestment Act was passed soon after the President took office, at a time when we were losing nearly 800,000 jobs per month and after real GDP fell at an annual rate of 8.3 percent in the fourth quarter of 2008. The Administration's prompt action helped to reverse these precipitous declines and paved the way to a sustained economic recovery. More than a dozen additional fiscal actions by the

Administration and Congress, including enactment of the temporary payroll tax holiday and continuation of emergency assistance for the long-term unemployed, further supported demand and fostered continued job growth.

Although Administration actions helped spark the initial stages of the ongoing recovery, restrictive fiscal policies, including the across-the-board cuts imposed under sequestration, and a series of manufactured crises, including a Government shutdown in October 2013 and continuing threats to put the Nation in default by failing to raise the debt limit, held down the GDP growth rate and limited gains in employment last year. However, the Bipartisan Budget Act of 2013 and the subsequent Consolidated Appropriations Act of 2014 reduced the economic uncertainty created by fiscal policy and partially reversed the sharp cuts imposed under sequestration. As a result, fiscal drag in 2014 is considerably less than last year, and, with the stabilization in State and local spending, the overall government sector is expected to be approximately neutral for GDP growth this year.

Although the fiscal constraint on the economy lessened this year, the economy was struck by unusually cold and snowy weather, which dampened economic activity in the first quarter. A decline in the rate of increase in business inventories following a substantial buildup in the second half of 2013 also reduced growth, along with declines in health spending and net exports. As a result of these factors, the latest Bureau of Economic Analysis (BEA) estimate is that the economy contracted at a 2.9 percent annual rate during the first quarter, although several other economic indicators suggest a less negative outlook on the first quarter. At the time the economic assumptions were finalized, the BEA estimated a 1.0 percent decline.

Following the temporary disruption in growth caused by these idiosyncratic factors, and assuming adoption of the President's proposed fiscal plan, the Administration projects economic growth to rebound in the second quarter and remain above trend during the second half of 2014 and through 2017. The

decline in the unemployment rate over the past several months has been more rapid than was expected in the 2015 Budget forecast, and unemployment is now projected to reach its long-term level a year and a half earlier than in the Budget projection.

Beyond 2017, the Administration's forecast is based on the long-run trends expected for real GDP growth, price inflation, and interest rates. Projected real GDP growth in the long run is below the historical average for the United States because of an expected decline in the growth of the labor force as the baby-boom generation retires.

ECONOMIC PROJECTIONS

The MSR economic projections are based on information available through late May 2014, and assume adoption of the policies in the President's 2015 Budget. The projections are summarized in Table 2.

Real Gross Domestic Product (GDP): Real GDP is expected to rise by 2.6 percent during the four quarters of 2014, and growth is expected to average 3.3 percent for 2015 and 2016, declining to 2.6 percent in 2017 as the economy nears full employment. The average growth rate from 2013-2018 is somewhat below what was published in the 2015 Budget because the more rapid-than-expected drop in unemployment results in a lower estimate of the remaining output gap. Beyond 2017, real GDP growth is projected to remain steady at 2.3 percent per year in 2021-2024, the same as in the 2015 Budget.

Unemployment: The unemployment rate is projected to reach 6.0 percent by the fourth quarter of 2014, two-tenths of a percentage point below its average level during the second quarter of 2014. Unemployment is projected to decline at a moderate pace in part because, as labor market conditions improve, discouraged workers are expected to rejoin the labor force. With continued growth, the unemployment rate is projected to continue to fall, stabilizing at 5.4 percent in 2017. As a result of the sharp decline in the unemployment rate in recent months, it is projected to reach this level six quarters earlier than in the Budget forecast.

Inflation: Overall inflation, as measured by the consumer price index (CPI), has been

roughly stable in the 1 to 2 percent range. Core inflation, excluding food and energy prices, was 2.0 percent during the 12 months through May 2014, close to the Federal Open Market Committee's (FOMC) target. In the long run, the overall CPI inflation rate is projected to be 2.3 percent per year, unchanged from the 2015 Budget projection. The chained price index for gross domestic product, another key measure of inflation, is projected to increase by 1.5 percent in 2014, and rise gradually to 2.0 percent in 2017 and then continue to rise at that pace through the end of the forecast horizon.

Interest Rates: The projections for interest rates are based on financial market data and market expectations at the time the forecast was completed. The three-month Treasury bill rate is expected to average only 0.1 percent in 2014. It is expected to begin to rise in 2015 and to reach 3.6 percent in 2021. The yield on the 10-year Treasury note is expected to average 2.8 percent in 2014 and to rise to 4.8 percent in 2021. The ultimate level of the three-month rate is 10 basis points less than projected in the 2015 Budget, while the 10-year rate is about 30 basis points less than previously projected. This change, which brings the Administration forecast into line with the consensus of private professional forecasters, reflects a reexamination of the relationship between economic growth and interest rates. As noted above, demographic changes are forecast to produce GDP growth rates below the long-term historical average in the final years of the projection period. Both economic theory and historical data suggest that these lower growth rates are likely to be accompanied by real interest rates that are also below their long-term historical averages.

Incomes and Income Shares: Through 2013, corporate profits rebounded more quickly than labor compensation (which consists of wages and salaries and employee fringe benefits) while interest rates remained low. As a result, corporate profits have risen as a share of total income, while the labor compensation share is below its long-run average. As the economy recovers, some of this shift in shares is expected to reverse. Labor compensation and interest payments are projected to rise somewhat relative to total income, while the corporate profits share is projected to fall. The wage share (which excludes fringe benefits) is also expected to recover from its recent low level in

step with the increase in total compensation. These projections are little changed from those in the Budget.

Administration's projected rate of GDP growth is about the same as the Blue Chip consensus, but is about 0.2 percentage points higher than CBO.

FORECAST COMPARISONS

A comparison of the MSR forecast with the 2015 Budget, and with the most recent Blue Chip consensus (an average of about 50 private-sector forecasts), the Congressional Budget Office (CBO), and the FOMC forecasts from June, is shown below in Table 3. For 2014, the Administration's 2.6 percent projected rate of real GDP growth during the four quarters of the year is higher than those of the other forecasters, in part because of the assumption that Congress will enact the policies proposed in the President's 2015 Budget before the end of the year. During 2015, real GDP growth (Q4/Q4) is expected to be 3.4 percent, which is above the June Blue Chip consensus of 3.0 percent, but is close to the most recent CBO forecast (from February). This pattern is similar in 2016 as well. In the long term, the

The Administration projects that unemployment will decline to 6.0 percent in the fourth quarter of 2014, and to 5.6 percent at the end of 2015. The June Blue Chip consensus is slightly higher. (The CBO projections – last updated in February – assumed a somewhat higher trajectory for the unemployment rate, but were made before the 0.4 percentage point decline over the past several months.) The FOMC also projects that unemployment will fall. By the fourth quarter of 2016, the central tendency of the FOMC forecast ranges from 5.1 percent to 5.5 percent.

The forecasts are fairly similar for inflation and interest rates among the forecasters. The Administration forecast projects inflation and interest rates that are nearly identical to the Blue Chip consensus in the long run.

RECEIPTS

The Mid-Session Review (MSR) estimates of receipts are below the 2015 Budget estimate by \$9 billion in 2014 and about the same as the Budget estimate in 2015. In each subsequent year, the MSR estimates of receipts are below the Budget estimates by amounts that rise annually from \$16 billion in 2016 to \$130 billion in 2024, for a decrease in receipts of \$760 billion over the 10-year budget horizon (2015 through 2024).

The net decrease in 2014 receipts is in large part attributable to revised economic assumptions, which reduce receipts by \$12 billion. Delay in enactment of the Administration's receipt proposals partially offsets this reduction, increasing 2014 receipts by \$3 billion.

The estimate of 2015 receipts is about the same as the Budget estimate because a \$22 billion reduction in receipts attributable to revised economic assumptions and a \$2 billion reduction in the effect of the Administration's proposals on receipts are offset by a net \$24 billion increase in receipts attributable to technical factors.

The \$760 billion reduction in receipts over the 10-year budget horizon is largely the result of a \$553 billion loss in receipts attributable to revisions in the economic forecast. Technical revisions based on new tax reporting data, collections to date and other information reduce receipts by an additional \$207 billion. There is little change in the net savings from Administration policies.

ECONOMIC CHANGES

Revisions in the economic forecast reduce receipts by \$12 billion in 2014, \$22 billion in 2015, and \$25 billion to \$80 billion in each subsequent year, for a total reduction of \$553 billion over the 10 years from 2015 through 2024. In 2014, revisions to the economic forecast have the greatest effect on individual and corporation income taxes, reducing those sources of receipts by \$4 billion and \$8 billion, respectively. The reduction in individual income taxes is primarily attributable to reductions in the forecast of nonwage sources of personal income. Changes in the forecasts of GDP and other economic

measures that affect the profitability of corporations are primarily responsible for the reduction in 2014 corporation income taxes.

Over the 10-year budget horizon, revisions in the economic forecast reduce collections of individual income taxes and social insurance and retirement receipts by \$458 billion and \$307 billion, respectively. Reductions in the economic forecasts of wages and salaries and nonwage sources of personal income are primarily responsible for the reduction in individual income taxes. Reductions in the forecasts of wages and salaries and proprietors' income, which are the tax base for Social Security and Medicare payroll taxes, the largest components of social insurance and retirement receipts, account for most of the reduction in this source of receipts. The 10-year reductions in individual income taxes and social insurance and retirement receipts are partially offset by increases in corporation income taxes of \$219 billion. Reductions in the forecasts of wages and interest rates offset the effects of the downward revisions in the forecast of GDP, resulting in a net increase in taxable corporate income relative to the Budget forecast. Revisions in the forecasts of GDP, interest rates, imports, and other sources of income reduce all remaining sources of receipts by a net \$7 billion.

TECHNICAL CHANGES

Technical revisions in the estimates of receipts are offsetting in 2014, but increase receipts in 2015 and 2016 by a net \$24 billion and \$9 billion, respectively. Technical revisions reduce receipts in each subsequent year by amounts that rise annually from a net \$7 billion in 2017 to a net \$53 billion in 2024, for a net reduction of \$207 billion over the 10 years, 2015 through 2024. Technical revisions have the greatest effect on corporation income taxes, reducing collections by \$13 billion in 2014, and by \$2 billion to \$68 billion in each subsequent year, for a total reduction of \$444 billion over the 10-year budget horizon. These reductions in corporation income taxes are in large part attributable to more recent collections data and revisions in the corporation income tax model based on updated tax

and other data. In contrast, more recent collections data and revisions in estimating models increase collections of individual income taxes and social insurance and retirement receipts in each year and by \$133 billion and \$115 billion, respectively, over the 10 years, 2015 through 2024. Technical revisions in all other sources of receipts (excise taxes, customs duties, estate and gift taxes, deposits of earnings of the Federal Reserve System, and penalties and fees) result in a net increase in receipts in each year, 2014 through 2018, and a net reduction in receipts in each subsequent year, for a net 10-year reduction of \$10 billion.

REVISIONS IN PROVISIONS EXTENDED IN THE ADJUSTED BASELINE AND PROPOSALS

The adjusted baseline permanently continues the American Opportunity Tax Credit and improvements to the Child Tax Credit and Earned Income Tax Credit that were

initially enacted in the American Recovery and Reinvestment Act of 2009 and extended through tax year 2017 under the American Taxpayer Relief Act of 2012. Revisions in the estimated cost of extending these provisions increase receipts in each year, beginning in 2018, and by \$13 billion over the 10 years, 2015 through 2024. This reduction in the cost of extending these provisions reflects the effect of the revised economic assumptions and technical factors on the total cost of extending these provisions, as well as a reallocation of a portion of the cost from receipts to outlays.

Revisions in the estimates of the Administration's proposals reduce receipts by a net \$13 billion over the 10 years, 2015 through 2024. These revisions, which reflect the revised economic forecast and technical re-estimates based on more recent collections data and other information, are the net effect of relatively small revisions in the estimates of a number of provisions.

* \$500 million or less.

EXPENDITURES

Outlays for 2014 are now estimated to be \$3,576 billion, \$75 billion lower than the 2015 Budget estimate, reflecting slower-than-expected spending across a range of discretionary and mandatory programs. Projected total outlays have decreased by \$38 billion in 2015 relative to the Budget, and by \$167 billion over the 10-year budget horizon, 2015 to 2024, primarily in the first five years. These decreases in spending are primarily the cumulative effect of economic and technical reestimates in a number of mandatory programs, as well as in interest payments.

ENACTED LEGISLATION AND REVISIONS IN PROPOSALS

Relative to the estimates in the Budget, legislation enacted since the Budget was completed has had only a modest impact on outlays. In 2014, enacted legislation increases spending by \$1 billion relative to the 2015 Budget policy levels. Enacted legislation continues to have a minimal effect on spending over the next 10 years, 2015 through 2024, increasing outlays by \$2 billion over that time period. The two largest pieces of enacted legislation are described below.

An Act to ensure that the reduced annual cost-of-living adjustment to the retired pay of members and former members of the Armed Forces under the age of 62 required by the Bipartisan Budget Act of 2013 will not apply to members or former members who first became members prior to January 1, 2014, and for other purposes (P.L. 113-82). The Bipartisan Budget Act of 2013 (BBA) reduced the annual cost-of-living adjustment (COLA) to the retired pay of members and former members of the Armed Forces under the age of 62. P.L. 113-82, which was signed into law on February 15, 2014, after the estimates for the 2015 Budget were completed, amended the BBA to provide that the COLA reduction would not apply to members or former members who first joined the Armed Forces prior to January 1, 2014. Relative to the Budget, this legislation increases spending by \$3 billion over the next 10 years.

Protecting Access to Medicare Act of 2014 (P.L. 113-93). This bill extended relief from scheduled cuts in Medicare physician payments through March 2015, extended a number of Medicare, Medicaid, and other program authorizations, and included several provisions that overlapped with the Administration's Medicare and Medicaid savings proposals. Enacted on April 1, 2014, P.L. 113-93 increases outlays in 2014 by \$1 billion, but reduces outlays by \$1 billion over the next 10 years.

In addition, two proposals submitted to the Congress by the Administration since publication of the Budget have modest impacts on estimated outlays.

Budget Amendment for Overseas Contingency Operations. On June 26, 2014, the Administration submitted a package of 2015 Budget amendments for the Department of Defense (DOD) and the Department of State and Other International Programs (State/OIP) to fund Overseas Contingency Operations (OCO). For DOD, these amendments replaced the \$79.4 billion placeholder included in the Budget with an updated request for \$58.6 billion in new budget authority, reducing projected outlays in 2015 by \$13.3 billion. For State/OIP, these amendments reflected an increase of \$1.4 billion in new budget authority over the original request, increasing projected outlays in 2015 by \$0.5 billion. Total projected outlays from OCO budget authority through 2024 are unchanged; this reflects the Budget's continued assumption of a multi-year cap of \$450 billion on Government-wide OCO funding from 2013 to 2021, which the Administration has proposed in each of the last three Budgets.

Proposed 2014 supplemental for the humanitarian situation along the Nation's southwest border and emergency wildfire suppression. On July 8, 2014 the President transmitted a supplemental request that included funding to comprehensively address the urgent humanitarian situation on the Nation's southwest border due to the significant increase in the migration of unaccompanied children and adults traveling

with children, and for emergency wildfire suppression activities.

ESTIMATING CHANGES

Estimating changes are due to factors other than enacted legislation or changes in policy. These result from changes in economic assumptions, discussed earlier in this Review, and changes in technical factors. Relative to the Budget estimates, economic and technical changes decrease estimated outlays for 2014 by \$79 billion, and decrease outlays by \$168 billion from 2015 through 2024.

Discretionary programs. Outlays for discretionary programs decrease by \$27 billion in 2014 but rise by \$19 billion over the next 10 years relative to the Budget as a result of technical revisions. These changes reflect lower outlays in 2014 compared to the Budget for both defense and non-defense discretionary programs, due to slower-than-expected spending patterns. About one-third of the \$27 billion reduction in 2014 is in defense programs and Overseas Contingency Operations, primarily reflecting slower-than-expected outlays in several large operation and maintenance accounts, partially offset by faster-than-expected outlays in a variety of investment accounts. The remaining two-thirds is in non-defense programs, most notably in the Departments of Housing and Urban Development and Homeland Security, due to slower-than-anticipated outlays of Hurricane Sandy recovery funds.

Refundable Premium Tax Credit and Cost-sharing Reductions. Changes in technical assumptions for the refundable portion of the premium tax credit and related payments for cost sharing reductions reduce outlays by \$19-24 billion a year for 2014 through 2017, with increases for 2019 through 2024 and a total increase of \$35 billion (or 3.6 percent) from 2015 through 2024. This increase in outlays is partially offset by \$7 billion in increases to receipts also due to technical changes, for a net increase of \$29 billion when outlay and revenue effects are taken into account.

Medicare. Economic and technical changes reduce outlays for Medicare by \$6 billion in 2014, and by \$32 billion over the next 10 years. Decreases in Parts A and B reflect lower fee-for-service enrollment and lower spend-

ing estimates for a range of services, including lower spending on durable medical equipment due to competitive bidding and lower spending on physician services. In addition, projected slower growth of market basket and price indices result in decreased outlays relative to the Budget. These decreases are partially offset by increases in Part D, due to the net effect of higher-than-expected enrollment, higher-than-estimated spending on reinsurance coverage, and higher-than-estimated average drug rebates.

Unemployment compensation. Changes in economic and technical assumptions decrease outlays for unemployment benefits by \$4 billion in 2014. From 2015 through 2024, outlays are down by an additional \$27 billion relative to the Budget estimate. The reduction is driven in large part by continued decline in insured unemployment as well as lower actual spending in recent months than had been assumed in the Budget. In addition, the revised MSR economic forecast, which assumes lower near-term civilian unemployment rates and a smaller labor force than was assumed in the President's Budget, contributes somewhat to the downward revision in spending during the Budget window.

Earned Income Tax Credit (EITC). Estimating changes increase outlays for the EITC by \$26 billion from 2015 through 2024. Most of the upward revision can be attributed to changes to economic assumptions relative to the Budget for GDP, personal income, wages, and inflation that cause more beneficiaries to be projected to stay within the income eligibility requirements for longer periods of time. Technical changes also contribute modestly to the increase, as a result of revisions to reflect actual participation in the current year and improved projections of future participation.

Medicaid. Technical and economic revisions increase projected Federal outlays for Medicaid by \$1 billion in 2014, and decrease outlays by \$24 billion over the next 10 years from 2015 to 2024 relative to the Budget estimates. The 10-year decrease stems primarily from projected decreases in the anticipated costs of the Affordable Care Act Medicaid expansion, as well as slower medical inflation and wage growth, partially offset by other technical adjustments.

Child Tax Credit (CTC). Estimating changes increase outlays for the CTC by \$1 billion in 2014 and decrease outlays by \$20 billion from 2015 through 2024. Most of the downward revision can be attributed to lower actual outlays, due to fewer CTC claims during the recent tax filing season. Changes in the economic forecast for the MSR increase outlays relative to the Budget in 2017 and beyond due to lower projected wages, leading to an increase in the number of taxpayers assumed to fall within the eligible income range for the credit.

Social Security. Estimating changes reduce outlays for Social Security by \$6 billion in 2014 and by an additional \$15 billion over the next 10 years. Reductions in 2014 in both the Old Age and Survivors' Insurance (OASI) and Disability Insurance (DI) programs are primarily due to lower-than-expected numbers of beneficiaries in recent data. Lower spending in both programs in 2015 and beyond is the net effect of economic changes resulting in higher inflation and therefore higher cost-of-living adjustments in 2015 through 2021 than were assumed in the Budget and technical changes that more than offset this effect, including fewer beneficiaries than expected applying for disability benefits and early retirement.

Foreign Military Sales Trust Fund (FMSTF). Outlays for the FMSTF increase by \$2 billion in 2014 and an additional \$15 billion over the next 10 years, due to decreased deposit projections for new military sales and changes in outlay estimates for large military sales.

Pension Benefit Guaranty Corporation (PBGC). Outlays for PBGC decrease by \$14 billion between 2015 and 2024 due to economic and technical factors. An increase in PBGC's assumed rate of return leads to greater receipts and larger transfers from the nonbudgetary trust fund. Technical revisions reflect refinements to the models PBGC uses to estimate single-employer and multi-employer plan behavior, including the incorporation of more recent data.

Supplemental Nutrition Assistance Program (SNAP). Outlays for SNAP decrease relative to the Budget by \$2 billion in 2014 due to technical revisions, and increase

by \$12 billion over the next 10 years relative to the Budget due to economic and technical factors. Even with the 10-year increase, the MSR still reflects decreasing benefit costs over the 10-year window. Economic revisions due to higher projected food prices account for much of the increase compared to the Budget. Technical changes reflect lower-than-expected participation and adjustments to more accurately reflect program changes.

Deposit Insurance Fund (DIF). Technical and economic changes lower deposit insurance spending in 2014 by \$4 billion, but raise spending over 2015 through 2024 by \$12 billion. The short-term reduction in spending is attributable to fewer bank failures experienced to date than were projected in the Budget. The outyear spending increase is attributable to lower future premiums, as fewer future bank failures relative to the Budget reduce replenishments to the DIF. Revised forecasts of GDP, inflation, and interest rates also result in some minimal outyear spending increases.

Children's Health Insurance Program (CHIP). Estimating changes increase outlays for CHIP by \$1 billion in 2014 and decrease outlays by \$8 billion from 2015 through 2024. Reductions in the outyears reflect updated estimates of funds available for CHIP.

Proceeds from Government Sponsored Enterprises (GSEs). Receipts from dividend payments under Treasury's Preferred Stock Purchase Agreements with Fannie Mae and Freddie Mac have been revised upward in 2014 due to legal settlement benefits, partially offset by GSE losses in other areas, lowering net outlays by \$4 billion.

Net interest. Excluding the debt service associated with enacted legislation and policy changes, outlays for net interest are projected to increase by \$1 billion in 2014, but decrease by \$179 billion over the next 10 years. The change is largely due to revised interest rate and Consumer Price Index assumptions. Technical revisions reflect actual data through May for marketable and nonmarketable securities and through March for other actuals, as well as updated projections of financing assumptions, other means-of-financing, and other technical revisions.

2015 Mid-Session estimate	3,576	3,863	4,077	4,237	4,424	4,709	4,949	5,195	5,479	5,691	5,914		

*\$500 million or less.

¹ Includes change in allowance for future disaster costs.

² The Administration is currently considering the implications of the recent (May 16th) reduction of the nuclear waste fee to zero, which was directed by a court order issued last November. The changes in "other programs" include the following changes for fee collections (in billions of dollars) in the Nuclear Waste Disposal Fund account and do not reflect any final determination or decisions, and do not reflect any predictions, regarding what will be the fee in future years: 2014 \$0.649; 2015 \$0.366; 2016 \$0.371; 2017 \$0.371; 2018 \$0.372; 2019 \$0.374; 2020 \$0.374; 2021 \$0.373; 2022 \$0.373; 2023 \$0.372; 2024 \$0.372. These amounts are a placeholder utilizing a probabilistic estimate that assumes that the fee will not remain uncollected indefinitely.

³ Includes debt service on all reestimates.

SUMMARY TABLES

Table S-1. BUDGET TOTALS

(In billions of dollars and as a percent of GDP)

* \$500 million or less.

¹See Tables S-4 and S-7 for information on the adjusted baseline.²For total deficit reduction since January 2011, see Table S-3.³Business tax reform transition revenue finances the \$70 billion cost of above-baseline surface transportation investments (the PAYGO cost of the reauthorization proposal) plus \$78 billion in cash transfers necessary to ensure Transportation Trust Fund solvency over the four-year reauthorization period.⁴The details of the Administration's emergency supplemental request that included funding to comprehensively address the urgent humanitarian situation on the Nation's southwest border due to the significant increase in the migration of unaccompanied children and adults traveling with children, and for emergency wildfire suppression activities for 2014, were still being formulated when the 2015 Mid-Session Review estimates were finalized. An allowance of \$4.5 billion is included as a placeholder.

Table S-3. CUMULATIVE DEFICIT REDUCTION

(Deficit reduction (–) or increase (+) in billions of dollars)

	2015- 2024
Deficit reduction achieved through June 2014, excluding Overseas Contingency Operations (OCO):	
Enacted deficit reduction excluding pending Joint Committee enforcement:	
Discretionary savings ¹	–1,622
Mandatory savings	–87
Revenues	–723
Debt service	<u>–689</u>
Subtotal, enacted deficit reduction excluding pending Joint Committee enforcement	–3,120
Pending Joint Committee enforcement: ²	
Discretionary cap reductions	–533
Mandatory sequestration	–194
Debt service	<u>–151</u>
Subtotal, pending Joint Committee enforcement	<u>–877</u>
Total, deficit reduction achieved, excluding OCO	–3,997
Investments in growing the economy and creating opportunity:	
Investment proposals and offsets ³	–162
Debt service	<u>27</u>
Total, investments in growing the economy and creating opportunity	–135
Additional deficit reduction from tax and entitlement reform:	
Health savings	–404
Revenue proposals	–641
Immigration reform	–158
Debt service	<u>–178</u>
Total, additional deficit reduction	–1,381
Other changes to deficits:¹	
Replacement of mandatory sequestration	194
Proposed Budget Control Act cap adjustment for disaster relief and wildfires	24
Other emergency supplemental funding	1
Outlay effects of discretionary policy	–52
Debt service and indirect interest effects	<u>31</u>
Total, other changes to deficits	<u>197</u>
Grand total, achieved and proposed deficit reduction excluding OCO	–5,317
Memorandum: revenue and outlay effects of achieved and proposed deficit reduction:	
Enacted outlay reductions and 2015 Budget spending proposals	–3,362
Enacted receipt increases and 2015 Budget tax proposals	–1,797
Immigration reform	–158

Table S-3. CUMULATIVE DEFICIT REDUCTION—Continued

(Deficit reduction (–) or increase (+) in billions of dollars)

	2015- 2024
Memorandum, savings in Overseas Contingency Operations (OCO):	
Enacted reduction in OCO funding	–780
Proposed reductions in OCO	–689
Debt service	<u>–328</u>
Total, savings in overseas contingency operations (OCO)	–1,798

¹ Excludes savings from reductions in OCO.² Consists of mandatory sequestration for 2015-2024 and discretionary cap reductions for 2016-2021.³ See Table S-2 for details on investment proposals.

^{*} \$500 million or less.¹ See Table S-7 for information on adjustments to the Balanced Budget and Emergency Deficit Control Act (BBEDCA) baseline.² These amounts represent a placeholder for major disasters requiring Federal assistance for relief and reconstruction. Such assistance might be provided in the form of discretionary or mandatory outlays or tax relief. These amounts are included as outlays for convenience.³ Consists of mandatory sequestration for 2015-2024 and discretionary cap reductions for 2016-2021.⁴ Excludes discretionary cap reductions for Joint Committee enforcement.

Table S-5. PROPOSED BUDGET BY CATEGORY
(In billions of dollars)

	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Totals	2015-2019	2015-2024

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Totals	
												2015-2019	2015-2024
Make unemployment insurance surtax permanent ²	-1,058	-1,466	-1,493	-1,520	-1,544	-1,569	-1,592	-1,616	-1,642	-1,669	-7,081	-15,169
Enhance and modify the conservation easement deduction:													
Enhance and make permanent incentives for the donation of conservation easements	5	8	12	16	28	51	67	70	74	41	331
Eliminate the deduction for contributions of conservation easements on golf courses	-37	-53	-55	-59	-61	-64	-68	-71	-74	-77	-265	-619
Restrict deductions and harmonize the rules for contributions of conservation easements for historic preservation	-8	-11	-16	-22	-26	-27	-28	-31	-32	-33	-83	-234
Subtotal, enhance and modify the conservation easement deduction	-45	-59	-63	-69	-71	-63	-45	-35	-36	-36	-307	-522
Eliminate the deduction for dividends on stock of publicly-traded corporations held in certain ESOPs	-618	-767	-776	-786	-795	-806	-816	-824	-834	-843	-3,742	-7,865
Total, other revenue raisers and loophole closers	-3,459	-4,793	-5,041	-5,277	-5,494	-5,583	-5,609	-5,619	-5,650	-5,678	-24,064	-52,203
Reduce the tax gap and make reforms:													
Expand information reporting:													
Require information reporting for private separate accounts of life insurance companies	-1	-1	-1	-1	-1	-1	-1	-1	-3	-8
Require a certified Taxpayer Identification Number (TIN) from contractors and allow certain withholding	-21	-49	-83	-114	-119	-125	-130	-136	-142	-156	-386	-1,075
Modify reporting of tuition expenses and scholarships on Form 1098-T ³	-8	-113	-114	-115	-116	-118	-119	-120	-120	-120	-466	-1,063
Provide for reciprocal reporting of information in connection with the implementation of FATCA
Provide authority to readily share beneficial ownership information of U.S. companies with law enforcement	-1	-1	-6	-4	-3	-2	-2	-2	-12	-23
Improve compliance by businesses:													
Require greater electronic filing of returns

Table S-8. MANDATORY AND RECEIPT PROPOSALS—Continued

(Deficit increases (+) or decreases (-) in millions of dollars)

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Totals	
												2015-2019	2015-2024
Implement standards clarifying when employee leasing companies can be held liable for their clients' Federal employment taxes	-4	-5	-6	-6	-6	-7	-7	-7	-8	-8	-27	-64
Increase certainty with respect to worker classification	-81	-383	-746	-896	-981	-1,068	-1,162	-1,261	-1,369	-1,481	-3,087	-9,428
Increase information sharing to administer excise taxes ²	-4	-9	-13	-14	-15	-17	-17	-18	-19	-20	-55	-146
Strengthen tax administration:													
Streamline audit and adjustment procedures for large partnerships	-144	-192	-191	-188	-183	-177	-177	-180	-182	-184	-898	-1,798
Revise offer-in-compromise application rules	-1	-1	-1	-2	-2	-2	-2	-2	-2	-2	-7	-17
Expand IRS access to information in the National Directory of New Hires for tax administration purposes
Make repeated willful failure to file a tax return a felony	-1	-1	-1	-1	-2	-2	-2	-2	-10
Facilitate tax compliance with local jurisdictions	-1	-1	-1	-1	-2	-2	-2	-2	-2	-2	-6	-16
Extend statute of limitations where State adjustment affects Federal tax liability	-1	-4	-4	-4	-4	-4	-4	-5	-25
Improve investigative disclosure statute	-1	-1	-1	-1	-2	-2	-2	-2	-10
Require taxpayers who prepare their returns electronically but file their returns on paper to print their returns with a scannable code
Allow the IRS to absorb credit and debit card processing fees for certain tax payments	-1	-2	-2	-2	-2	-2	-2	-2	-2	-2	-9	-19
Provide the IRS with greater flexibility to address correctable errors ³	-7	-15	-16	-17	-17	-19	-19	-20	-21	-22	-72	-173
Make e-filing mandatory for exempt organizations
Authorize the Department of the Treasury to require additional information to be included in electronically filed Form 5500 Annual Reports and electronic filing of certain other employee benefit plan reports

Table S-8. MANDATORY AND RECEIPT PROPOSALS—Continued

(Deficit increases (+) or decreases (−) in millions of dollars)

Table S-8. MANDATORY AND RECEIPT PROPOSALS—Continued

(Deficit increases (+) or decreases (-) in millions of dollars)

	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	Totals	
												2015-2019	2015-2024
Addendum, reserve for long-run, revenue-neutral business tax reform:													
Modify and permanently extend renewable electricity production tax credit	28	120	241	382	523	661	811	978	1,158	1,349	1,294	6,251
Expand and simplify the tax credit provided to qualified small employers for non-elective contributions to employee health insurance	11	50	47	41	23	13	10	6	5	7	5	174	207

⁴This proposal costs \$1 million over 2015-2019 and \$3 million over 2015-2024.⁵This proposal costs less than \$500,000 in each year and over 5 and 10 years.⁶This proposal saves \$1 million over 2015-2019 and \$4 million over 2015-2024.⁷The provision is estimated to have zero revenue effect under the Administration's current economic projections.

⁸Because the Administration believes that these proposals should be enacted in the context of comprehensive business tax reform, the amounts are not reflected in the budget estimates of receipts and are not counted toward meeting the Administration's deficit reduction goals. The budget estimates do include \$150 billion in temporary revenues that would be generated by the transition to a reformed business tax system, shown as part of the proposal to reauthorize surface transportation above.

* Less than \$500 million.

¹ The discretionary funding levels from OMB’s adjusted baseline are consistent with the caps in the Balanced Budget and Emergency Deficit Control Act of 1985 (BBEDCA), as amended, with separate categories of funding for “defense” (or Function 050) and “non-defense” for 2014–2021. These baseline levels assume Joint Committee enforcement cap reductions are in effect through 2021. For 2022 through 2024, programs are assumed to grow at current services with Joint Committee enforcement no longer in effect, consistent with current law. The levels shown here for the non-defense category do not include the reclassification of surface transportation programs shown later in the table.

² The 2015 Budget provides a detailed request for 2015 at the cap levels provided in the Bipartisan Budget Act of 2013 (BBA). The Budget also proposes for 2015 an Opportunity, Growth, and Security Initiative to provide investments in both defense and non-defense programs; these amounts are not programmatically allocated.

**Table S-9. FUNDING LEVELS FOR APPROPRIATED
("DISCRETIONARY") PROGRAMS BY CATEGORY—Continued**

(Budget authority in billions of dollars)

³ Where applicable, amounts in 2013 through 2024 are existing or proposed cap adjustments designated pursuant to Section 251(b)(2) of BBEDCA, as amended. The 2015 Budget proposes new cap adjustments for program integrity and wildfire suppression activities. For 2016 through 2024, the cap adjustment levels for wildfire suppression are placeholders that increase at the policy growth rates in the President's Budget. The existing disaster relief cap adjustment ceiling (which is determined one year at a time) would be reduced by the amount provided for wildfire suppression activities under the cap adjustment for the preceding fiscal year. The amounts will be refined in subsequent Budgets as data on the average costs for wildfire suppression are updated annually.

⁴ The 2015 funding levels for Overseas Contingency Operations (OCO) for the Department of Defense and the Department of State and Other International Programs have been updated to reflect the amounts requested in the budget amendment that was transmitted to the Congress on June 26, 2014.

⁵ The 2015 Budget includes placeholder amounts of more than \$33 billion per year for Government-wide OCO funding from 2016 to 2021. These amounts reflect the Administration's proposal to cap total OCO budget authority from 2013 to 2021 at \$450 billion but do not reflect any specific decisions or assumptions about OCO funding in any particular year.

⁶ The details of the Administration's emergency supplemental request that included funding to comprehensively address the urgent humanitarian situation on the Nation's southwest border due to the significant increase in the migration of unaccompanied children and adults traveling with children, and for emergency wildfire suppression activities for 2014, were still being formulated when the 2015 Mid-Session Review estimates were finalized. An allowance of \$4.5 billion is included as a placeholder.

* \$50 million or less.

¹ Amounts in the actual and estimated years of 2013 and 2014 exclude changes in mandatory programs enacted in appropriations bills since those amounts have been rebased as mandatory, whereas amounts in 2015 are net of these proposals. In addition, 2013 levels include the effects of the March 1, 2013 Joint Committee sequestration reductions.

Table S-10. FUNDING LEVELS FOR APPROPRIATED (“DISCRETIONARY”) PROGRAMS BY AGENCY—Continued

(Budget authority in billions of dollars)

² The Department of Defense (DOD) levels in 2016–2024 include funding that will be allocated, in annual increments, to the National Nuclear Security Administration (NNSA). Current estimates by which DOD’s budget authority will decrease and NNSA’s will increase are, in millions of dollars: 2016: \$1,444; 2017: \$1,602; 2018: \$1,665; 2019: \$1,698; 2020: \$1,735; 2016–2024: \$15,507. DOD and NNSA are reviewing NNSA’s outyear requirements and these will be included in future reports to the Congress.

³ Funding from the Hospital Insurance and Supplementary Medical Insurance trust funds for administrative expenses incurred by the Social Security Administration that support the Medicare program are included in the Health and Human Services total and not in the Social Security Administration total.

⁴ The 2015 Budget provides a detailed request for 2015 at the cap levels provided in the Bipartisan Budget Act of 2013 (BBA). The Budget also proposes for 2015 an Opportunity, Growth, and Security Initiative to provide investments in both defense and non-defense programs; these amounts are not programmatically allocated.

⁵ The 2015 Budget includes allowances, similar to the Function 920 allowances used in Budget Resolutions, to represent amounts to be allocated among the respective agencies to reach the proposed defense and non-defense caps for 2016 and beyond. These levels are determined for illustrative purposes but do not reflect specific policy decisions.

⁶ Where applicable, amounts in 2013 through 2024 are existing or proposed cap adjustments designated pursuant to Section 251(b)(2) of the BBEDCA, as amended.

⁷ The 2015 funding levels for Overseas Contingency Operations (OCO) for the Department of Defense and the Department of State and Other International Programs have been updated to reflect the amounts requested in the budget amendment that was transmitted to the Congress on June 26, 2014.

⁸ The 2015 Budget includes placeholder amounts of \$33.2 billion per year for Government-wide OCO funding from 2016 to 2021. These amounts reflect the Administration’s proposal to cap total OCO budget authority from 2013 to 2021 at \$450 billion but do not reflect any specific decisions or assumptions about OCO funding in any particular year.

⁹ For 2016 through 2024, the cap adjustment levels are placeholders that increase at the policy growth rates in the President’s Budget. The existing disaster relief cap adjustment ceiling (which is determined one year at a time) would be reduced by the amount provided for wildfire suppression activities under the cap adjustment for the preceding fiscal year. Those amounts will be refined in subsequent Budgets as data on the average costs for wildfire suppression are updated annually.

¹⁰ The details of the Administration’s emergency supplemental request that included funding to comprehensively address the urgent humanitarian situation on the Nation’s southwest border due to the significant increase in the migration of unaccompanied children and adults traveling with children, and for emergency wildfire suppression activities for 2014, were still being formulated when the 2015 Mid-Session Review estimates were finalized. An allowance of \$4.5 billion is included as a placeholder.

* \$500 million or less.

¹A decrease in the Treasury operating cash balance (which is an asset) is a means of financing a deficit and therefore has a negative sign; that is, the reduction in cash balances reduces the amount that would otherwise be borrowed from the public. An increase in checks outstanding (which is a liability) is also a means of financing a deficit and therefore also has a negative sign.

²Includes checks outstanding, accrued interest payable on Treasury debt, uninvested deposit fund balances, allocations of special drawing rights, and other liability accounts; and, as an offset, cash and monetary assets (other than the Treasury operating cash balance), other asset accounts, and profit on sale of gold.

³Consists mainly of debt issued by the Federal Financing Bank (which is not subject to limit), Treasury securities held by the Federal Financing Bank, the unamortized discount (less premium) on public issues of Treasury notes and bonds (other than zero-coupon bonds), and the unrealized discount on Government account series securities.

⁴Legislation enacted February 15, 2014, (P.L. 113-83) temporarily suspends the debt limit through March 15, 2015.

⁵Treasury securities held by the public and zero-coupon bonds held by Government accounts are almost all measured at sales price plus amortized discount or less amortized premium. Agency debt securities are almost all measured at face value. Treasury securities in the Government account series are otherwise measured at face value less unrealized discount (if any).

⁶At the end of 2013, the Federal Reserve Banks held \$2,072.3 billion of Federal securities and the rest of the public held \$9,910.3 billion. Debt held by the Federal Reserve Banks is not estimated for future years.
